

Confined Space Entry & Rescue

COURSE OVERVIEW

This two day course provides personnel with a thorough understanding of the potential hazards and management controls required to carry out work in confined spaces safely.

The course combines classroom-based and practical learning, although the emphasis is on practical demonstrations and exercises using a purpose-built confined space training module.

TARGET AUDIENCE

This program is designed for those who may be required to participate in the rescue of an incapacitated worker from within a confined Space.

COURSE CONTENT

The syllabus focuses on:

- Legislation and Regulations
- Responsibilities
- Safe Systems of Work
- Confined Space Hazards
- Gases and Gas Monitoring
- Emergency Planning and Rescue
